

What does the correct turn feel like?

1. Take your usual posture position for golf.
2. Take your club and place it across your shoulders.
3. Keeping it fairly parallel to the ground simulate your shoulder turn.
4. Do the same for the hips, keeping the club parallel and keeping some flex in the back knee.
5. This will give you the feel of the correct turn in the swing, try and simulate it when you play.

GOOD LUCK
