

## 4 biggest putting mistakes

1. Too much wrists: Take the wrists out of the stroke and use your shoulders only
2. Moving your head: Keep your head still and watch the spot underneath the ball after it has gone
3. Rushing: Take your time and have a look at each putt before you play it, even the short ones can have break
4. Using a very short backswing and trying to create power by shoving or pushing the ball too hard: take a nice long backswing for the putt and allow the pendulum to do the work.

GOOD LUCK
