

Chip Pitch or Putt

1. Generally speaking it depends on the situation but if you are close to the edge of the green you can putt or chip and run.
2. If you are further away from the green and putting through a lot of grass is problematic then lift the ball up higher with a pitch shot.
3. When chipping or pitching, usually the flag needs to be middle or back for a chip and run to allow for the roll and nearer to the front is when you might choose to lift it up higher.

GOOD LUCK,

Anne
